Approach Plus 360

(40 - 105cm / ≤ 19.5kg)

This is an i-Size Enhanced Child Restraint System. It is approved according to UN Regulation No.129, for use in, i-Size compatible vehicle seating positions as indicated by vehicle manufacturers in the vehicle users' manual.

i-Size Universal (40-105cm ≤ 19.5kg)

If in doubt, consult either the Enhanced Child Restraint System manufacturer or the retailer

**NOTICE: DO NOT USE ON A PASSENGER SEAT
FITTED WITH ACTIVATED FRONTAL AIRBAG.**

INSTALLING THE CHILD SEAT

TO INSTALL THE BASE PLUS 360 CHILD RESTRAINT SYSTEM FOLLOW THE STEPS BELOW:

1.0. Attach the ISOFIX guides (10) to the vehicle's ISOFIX anchor points if required (see vehicle owner's manual).

The ISOFIX guides can protect the surface of the vehicle seat from being torn.

They can also guide the ISOFIX connectors. If your vehicle seat has built in guides, you do not need to use the ones provided.

1.1. Unfold the support leg (7) from storage compartment.

1.2. Extend the ISOFIX connectors (3) by pressing the ISOFIX adjustment button (2) while pulling on the connector

1.3. Line up the ISOFIX connectors (3) with the ISOFIX guides, and then click both ISOFIX connectors into the ISOFIX anchor points

Make sure that both ISOFIX connectors are securely attached to the vehicle's ISOFIX anchor points. There should be two audible clicks and the colors of the indicators on both ISOFIX connectors should be completely green.

Check to make sure the base is securely installed by pulling on both ISOFIX connectors.

1.4. After securing the ISOFIX, extend the support leg (7) to floor. When the support leg is installed correctly, the support leg indicator will show green. Red will be shown when installed incorrectly.

Make sure the support leg is in full contact with the vehicle floor pan.

The support leg has multiple positions. When the Support leg indicator shows red this means the support leg is in the wrong position.

1.5. The completely assembled base. The ISOFIX connectors must be attached and locked onto the ISOFIX anchor points. The support leg must be installed correctly with green indicator.

2.1. To remove the base from the vehicle seat, press the support leg adjustment button (8) and move upward. The support leg will no longer contact the vehicle floor.

2.2. To release the ISOFIX from the vehicle seat, push the secondary lock buttons first and then press the ISOFIX releasing buttons (2) on the ISOFIX connectors (3) before removing the base from the vehicle seat. Retract the ISOFIX

connectors (3) when the base is not in use.

AGELOCK ROTATION SWITCH

3.1 Base Plus 360 features AgeLock rotation switch (6). When $\leq 15m$ is visible the turntable (9) will not move to a forward facing position. Moving AgeLock to show $>15m$ will allow the turntable to lock forward facing.

NOTE! Approach Plus 360 requires mandatory rear facing use until your child is at least 15m + 76cm. We recommend you continue rear facing your child for as long as possible.

CONNECTING APPROACH PLUS 360 TO THE BASE

4.1. Rotate Base Plus 360 by pulling the rotation button (1). When rotation button (1) is held the base turntable (9) is free to move.

4.2. Position Approach Plus 360 over the base, locating the connection points. Push the child seat firmly onto the base. Ensure the connection indicator (5) is green

4.3. To remove Approach Plus 360 from the base, ensure it is rotated to the side loading position. Pull the QuickRelease strap (4) and lift the child seat off the base.

RECLINING APPROACH PLUS 360

5.1 To operate the inner seat recline (11), place your hand into the fabric slot and pull the grey lever firmly forward.

There are three inner recline positions

Position i - upright

Position ii - mid recline

Position iii - full recline

5.2 To operate the seat shell recline, pull the grey lever (12) located underneath the front of the seat shell.

There are four seat recline positions

Position i - Upright

Position ii - mid recline

Position iii - mid recline

Position iv - full recline

5.3 When using Approach Plus 360 rear facing, use seat shell recline position 4. Any inner recline position may be used.

5.4 When using Approach Plus 360 forward facing, any seat shell recline position may be used. Inner recline position 1 must be used when forward facing.

SETTING UP APPROACH PLUS 360 FOR THE CHILD

6.1 Approach Plus 360 has a three part newborn insert (13). The full insert must be used for children between 40-60cm in length.

When your child has exceeded 60cm, the insert may be freely adapted to best suit your child's comfort.

The newborn insert must never be used forward facing.

6.2 The headrest height should be adjusted for your child before they use Approach Plus 360. To adjust the headrest height, loosen the harness straps (17), squeeze the grey lever (14) at the top of the headrest. While squeezing the lever, adjust to the desired height.

Check the headrest height periodically throughout use of Approach Plus 360 - it will require adjusting as your child grows.

6.3 The headrest height should be level with your child's shoulders. If you find the headrest between height positions, opt for the lower setting when rear facing and upper setting when forward facing.

6.4 To secure your child in Approach Plus 360, loosen the harness (17) by pressing the adjuster button (15) and open the buckle (16)

6.5 Pull the shoulder straps (17) over the top of your child's shoulders. Ensure any coats or thick clothing is removed prior to securing the harness.

6.6 To secure the harness, first join the two harness buckle pieces together. Once together, push firmly into the buckle (16). There will be an audible CLICK when the buckle is connected.

6.7 Hold both harness straps between the buckle and shoulder pads, pull upward - this will remove any slack in the hip area of the harness. Next, pull the adjuster strap (17) firmly to tension the harness.

The harness should be tight enough that you cannot pinch the harness webbing together.

6.8 The images demonstrate a correctly secured baby and toddler in Approach Plus 360.

MAINTENANCE

FITTING/REMOVING THE COVER

Gently pull the front part of the cover.

There are plastic parts on the sides of the cover used to fasten it in place. Simply pull gently to remove the cover.

To fit the cover back on, follow the same steps in reverse. Insert the side parts in the slot.

CLEANING

The seat cover is easily removable and should be washed on a delicate cycle at 30 degrees celsius using a mild detergent. Take out all removable internal plastic/foam parts from inside any fabrics before washing.

Please follow the washing instructions on the care label on the cover.

Do not tumble dry the cover as the padding could come away from the fabric.

Do not expose the cover to the sunlight for prolonged periods. When the seat is not in use cover it up or store it in the luggage compartment.

PLASTIC/METAL PARTS

Wipe clean using a mild hand soap and warm water. You must not use detergents, solvents or strong soaps. This may weaken your infant carrier shell or harness. You must not remove, dismantle or alter any part of the infant carrier shell or harness.

You must not oil or lubricate any part of your infant carrier shell or harness system.
